

BROWN OUT KIT

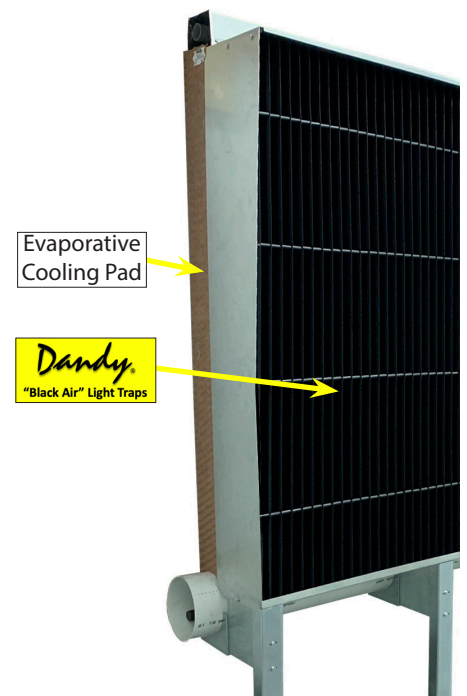

LIGHT CONTROL FOR EVAPORATIVE COOLING

American Coolair's Brown Out Kit for evaporative cooling systems provides **substantial light control** for greenhouses or poultry buildings and can be easily installed on the inside or outside of your building.

BROWN OUT KIT FEATURES

- Suitable for open top and closed top evaporative cooling systems
- Easy, bolt together assembly makes installation simple
- Available in 5' sections up to 110'
- Can accommodate 3' - 6' tall evaporative cooling pads
- Aluminum top, sides and bottom construction, with a heavy duty galvanized support system underneath
- Dandy® Brown-Out Light Traps maintain good air flow while providing excellent light reduction
- Designed to fit existing American Coolair evaporative cooling systems and available as a package when purchasing a new American Coolair evaporative
